and safety factors for LRFD and ASD as they apply to this limit state in the 2005 specification. For LRFD the resistance factor,  $\phi$ , is 1.0. Previous editions of LRFD used a resistance factor of 0.9. This is one area of the 2005 specification where LRFD has been altered to conform to prior editions of ASD. One of the

Whereas a first order analysis is fine for AISC 9th edition, AISC 360-05/10 has much more stringent stability requirements and promotes a new type of second order analysis called DIRECT ANALYSIS, although other forms of second order analysis/first order analysis are permitted under certain scenarios. These are some of the basic differences.

This Manual is the thirteenth major update of the AISC Steel Construction Manual, which was first published in 1927. With this revision, the previously separate Allowable Stress Design and Load and Resistance Factor Design methods have been combined. Thus, this Manual replaces both the 9th Edition ASD Manual and the 3rd Edition LRFD Manual.
