Lecture Material for Applied Econometrics (Spring 2020)

Conventional econometrics lectures usually introduce a method and then they apply it. I know however that in real life, it does not work that way. In real life, first there is a question, then there is the collection of hopefully relevant data, and finally, there is the method.

Introduction to Enjoyable Econometrics - Introduction ...

The course is intended for Ph.D. students and researchers in statistics, econometrics and finance. The course assumes familiarity with basic regression analysis, principles of univariate and multivariate time series analysis as well as basic models of volatility but is otherwise self-contained.
