Asperger Syndrome And Alcohol Drinking

Asperger Syndrome and Alcohol exposes the unexplored problem of people with Autism Spectrum Disorders (ASDs) using alcohol as a coping mechanism to deal with everyday life. Alcohol can relieve the anxiety of social situations and make those with ASDs feel as though they can fit in. Ultimately, however, reliance on alcohol can lead the user down a path of self-destruction and exacerbate existing problems.

Asperger's and Addiction. Some studies, such as one published in the journal *Drug and Alcohol Dependence*, suggest that Asperger's syndrome isn't connected to a heightened risk of addiction, as people who have this disorder don't tend to seek out unusual experiences. They seem to like things that are predictable, measurable and programmable, so they wouldn't enjoy the strange sights and sounds a bout of drug use or a bolt of alcohol could deliver.
