Click on the planets buttons at the bottom of the frame to enable/disable their related resources and see what can and can't still be produced on different combinations. Double click on planet button activates this planet, double click on single active planet activates all planets.

EVE Online Planetary Interaction Commodities Relations

Planetary Commodities are the materials and resources generated through Planetary Interaction. There are four tiers of planetary commodities produced in planetary interaction, each of which is used either in creating the next highest tier of commodity, or directly in another type of Industry as an input. Each type of planet has a mix of Raw Materials (sometimes called P0 commodities) which can be refined into basic Processed Materials, called P1 for short.

Planetary Commodities - EVE University Wiki

PI stands for Planetary Interaction. PI is you building some stuff on a planet that collects the resources on said planet. After that you can refine those resources Going from: RO→P1→P2→P3→P4 This link covers the raw materials and what they refine in to.

EVE Online: Planetary Interaction Guide (1 of 4) - YouTube

Planetary Interaction (PI) allows you to produce NPC trade goods from Raw Materials you extract from a planet by building a colony on that planet. These Raw Materials can be processed in the colony into various NPC trade goods. The general expectation is that the NPCs will stop selling these goods soon, so the value of PI products will be at the mercy of the Player market.

EVE Online | EVE Insider | Forums

This 40:5 ratio will result in 1500 P2 output per side for a total of 3000 units of P2 product. Each production cycle requires one hour of time. With the given setup of 10 Advanced Industry Facilities per side, the time for complete exhaustion of 12000 P1 materials is 30 hours. Producing the Tier 3 Planetary Material
